

IN THE CLAIMS:

Please amend the claims as follows:

Sub B1
1. (Amended) A method of providing information to a user comprising:
collecting information at a first computer system;
organizing said information into a plurality of first web-sites, each of said first web-sites
being addressable by a unique Universal Resource Locator (URL) and having a physical location
associated therewith;
[providing] assigning one of said first web-sites to a user as a user web-site; and
selecting links to a plurality of said first web-sites for presentation on said user web-site
based on a relationship between the physical locations associated with said first web-sites and the
physical location associated with said user web-site.

Sub B2
16. (Amended) A method of providing information to a user comprising:
collecting information at a first computer system;
organizing said information into a plurality of first web-sites, each of said first web-sites
being addressable by a unique Universal Resource Locator (URL) and having a physical location
associated therewith;
[providing] assigning one of said first web-sites to a user as a user web-site;
selecting links to a plurality of said first web-sites for presentation on said user web-site
based on a relationship between the physical locations associated with said first web-sites and the
physical location associated with said user web-site; and
accessing said user web-site by a second user.
